Dude Solutions - Olympia, WA

- ▶ Scaled bill images from 1000 clients to unlimited clients
- ▶ Increased page load times dramatically
- ▶ Laid the foundation for parallel integration tests
- ▶ Lead my team's effort to integrate with Kafka
- ▶ Increased front end code quality by introducing eslint and tailoring the rules to be useful.
- ▶ Increased Back end code quality by introducing resharper
- ▶ Designed the prototype system for location mapping across products.
- ▶ Helped in migration to GIT from sourceanywhere
- ▶ Wrote stored procs to deliver fast reports

Full Stack Developer (4/2016 –3/2019)

New Energy Technology - Olympia, WA

- ▶ Increased the web app performance by %100 and decreased memory usage by half.
- ▶ Managed data and helped in the migration of JCPenne's software upgrade.
- ▶ wrote a front end to review visual regressions
- ▶ Wrote a testing framework with thousands of test cases covering both front and back end.
- ▶ introduced and implemented jenkins cli
- ▶ automated builds and reduced build times from several days to one minute.

IT technician (9/2013 – 4/2016)

SelbySoft - Puyallup, WA

- ▶ Automated data entry with Python
- ▶ Resolved tickets of all levels
- ▶ Created new network imaging procedures for tablets

Education

AA (2016) Centralia College

- ▶ C++ - wrote a command line dungeon game like zork
- ▶ Java - introduction to programming
- ▶ continuous education through several online platforms

Side Projects:

I am writing a point of sale system with electron, react, and node to be a client side system. I am adding features such as dynamic food items that can be easily added without knowing how to program.
